

WL Ice 900

The ultimate ice & water solution

Making water and ice great

Waterlogic's Ice 900 combines a modern design with the latest technology. With a separate water delivery and a daily ice production of 44lbs, plus additional storage of 8.8lbs, this machine is perfect to cater for a high number of users: the ideal choice for busy workplaces and environments.

Advanced technology

This dispenser utilizes reverse osmosis to give you fresh water and ice.

Ultimate filtration

When it comes to total filtration you cannot get better than reverse osmosis (RO). This stage removes chlorine, impurities, waterborne tastes and odors.* RO achieves removal of unwanted contaminants from the water leaving great tasting water and ice.

*Where applicable

Expert ice-making technology

The WL Ice 900 is the worlds first ice-making technology within a water purification system. It provides crystal clear ice, produced with the Freezing point method, and clean fresh tasting water.

Elegant design

Characterized by sleek, streamlined lines and premium glossy finishing, the WL Ice 900 stylishly complements the interiors of even the most sophisticated workplaces.

Features

A versatile dispenser for ice and separate hot, cold and ambient water delivery (varying temperatures from a single spout)
Default function to cold: designed to automatically convert to cold water mode when in queue
Integrated ice-making and water-cooling system designed for high energy efficiency
Continuous water dispensing with a single touch
Leak detection system and hot water/ice locking function provide extra protection, reducing risks of accident
Modern control panel with touch sensitive buttons for easy operations
Blue LED lighting function indicators

Water options

cold	sparkling	ambient	hot	ice
