

3-Stage RO System

Designed for simplicity by offering the essentials of a high quality RO system. With multiple stages of filtration, expect everything you need in one compact unit. Perfect for any common application that requires a reliable RO system.

4-Stage RO System

Designed with the addition of a carbon inline post-filter for "after-the-RO" filtration. Further removes bad tastes and odors with a final polish before going to the point-of-use. Perfect for applications that want the freshest tasting drinking water in every glass.

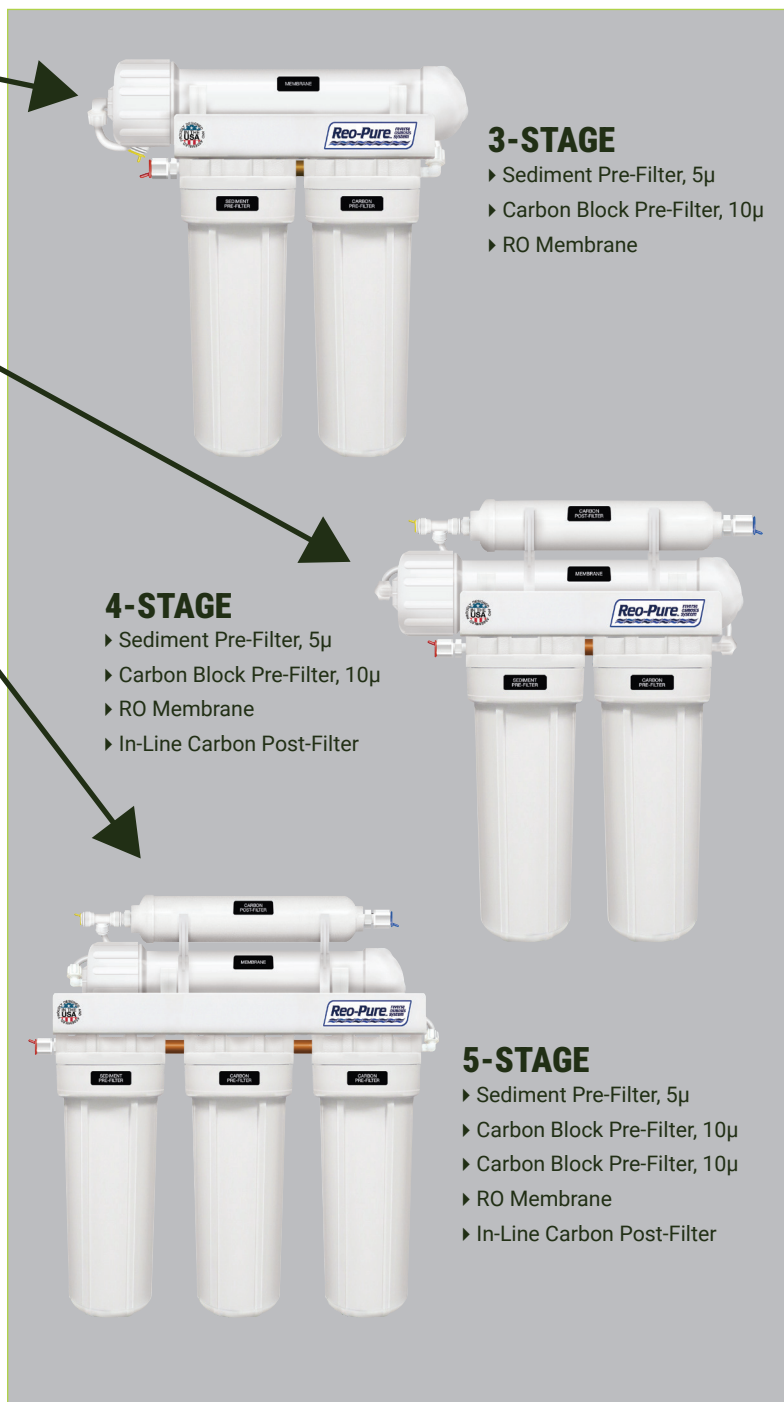

5-Stage RO System

Designed with a second carbon pre-filter for more "before-the-RO" filtration. The additional carbon cartridge provides longer lasting protection under certain harsh feed water conditions. Perfect for applications that desire less filter changes or with feed water that has high levels of chlorine and other contaminants.

STANDARD FEATURES

- High Quality RO Membrane
- Superior Pre-Treatment Filters
- Automatic Shutoff Valve
- John Guest® Quick Connect Fittings*
- Installation Parts Packet
- Easy to Follow User Manual
- Fully Assembled
- One Year Limited Warranty
- Assembled in the U.S.A
