

WATER CONDITIONERS

Residential Dual Media Water Conditioners

THE SOFTEST, CLEANEST WATER BEGINS WITH INDY SOFT WATER

VESTA WHOLE HOUSE FILTERS

Each VESTA Water Conditioner is designed to specifically address the water quality issues that are unique to your home, providing your family with outstanding water, cleaner dishes, scale-free plumbing fixtures, spot free cleaning, and a reduction in dry skin & scalp. The Mid-Vortech[®] tank maximizes the media efficiency with two separate media chambers in one tank. The cut-a-way below shows what lies beneath the tank jacket – each chamber of the mineral tank features a separate media to treat specific needs.

- COCONUT GRANULAR ACTIVATED CARBON

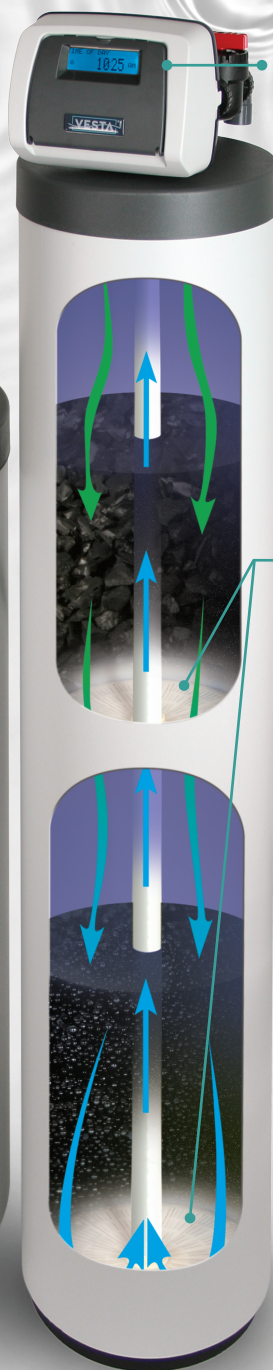

Pore structure provides a wide range of contaminant reduction capabilities. Used for the removal of chlorine, chloramines, dissolved organic contaminants in the water, and process liquids.

- KDF PROCESS MEDIA

Designed specifically for reducing chlorine and water-soluble heavy metals, controlling scale, bacteria, and algae – even in hot water. NSF Certified.

- 10% CROSSLINKED CATION RESIN

A premium grade, strong acid resin is utilized, increasing resin bead strength and greatly improving media lifespan.

VESTA PROFESSIONAL SERIES CONTROL VALVE

- Water use is continuously monitored for peak efficiency
- Saves salt and water by only regenerating when necessary
- Built-in backup of settings during power outages
- Easy maintenance with simple diagnostics and design

MID-VORTECH STYLE DISTRIBUTION TANK

- Dual media chambers keep media separate for more contact time and greater efficiency
- Reduces salt consumption
- Up to 30% less water required for backwash flow rate
- Delivers evenly distributed and high quality flows

HIGH QUALITY BRINE TANK

- Safety float system helps prevent overflow of the brine tank
- Constructed of corrosion-free materials
- Larger brine tank sizes and optional salt grid available

DUAL MEDIA WATER CONDITIONERS
